- black/red/black (200C, blackC)
- black/yellow/black (blackC, 101C)

Thinsulate

Air molecules cling to the body. The more air a material stores in a certain space, the higher the insulation level will be. Microfibrils are much finer than other fibres. Therefore, they enclose more air within a smaller space thus offering a better insulation. The advantage: breathable, moisture-repellent and suited both for washing in the washing machine and for dry cleaning.
