Mouth to mouth shield keyholder

Be prepared to help others in need. Add a logo and show that you care. We have designed two nice small key ring holders and added out mouth-to-mouth shield. The mouth-to-mouth shield has a round size

non-woven fabric membrane in the center that resist water and saliva, but is still safely ventilated. Mouth to mouth mask can bed used on emergency artificial respiration, and prevent disease and infection.

Mouth to mouth shield

key holder

- 1 Key holder
- 1 Face shield

MyKit medium

MyKit medium is quite a bit larger than our standard box and is intended for the household e.g. the summerhouse, having in the car etc. as this size can contain bigger first aid products like bandages, icepack, first aid blanket etc.

Automobile First Aid - Hard boxes

Trio & Duo DIN 13164:2014

Our Trio & Duo car safety kit has been designed to meet all the legal requirements of the relevant vehicle safety sections including German motor vehicle registration regulation, StVZO §35h and 53a. We have added a warning triangle and HW2 - EN ISO 20471:2013 Hi-Vis vest to our Trio box or Soft bag.

Choose your needs between DIN 13164:2014 first aid kit + Safety vest and a warning triangle.

NOTE! You can design your own personalized TRIO and DUO label on orders for only 25 pcs.

DIN Content

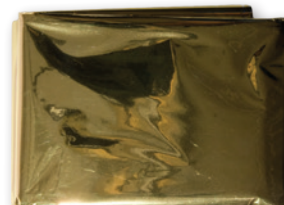

DIN 13164:2014 is a packaged first aid kit content that all cars in Germany must carry by law. It reaches the German DIN standard (Deutsche Industrie Norm). This content complies with the German standard DIN 13164:2014 and conforms to the German Act for the

registration of motor vehicles StVZO. Due to the enormous numbers made for the European market this represents tremendous value for money.

- 3 Towel tablet

Choice of Content 1-2-3-4-5 system

First aid is the provision of initial care for an illness or injury. It is usually performed by a non-expert person to a sick or injured person until definitive medical treatment can be accessed. Certain self-limiting illnesses or minor injuries may not require further medical care past the first aid intervention. It generally consists of a series of simple and in some cases, potentially life-saving techniques that an individual can be trained to perform with minimal equipment.

THE RFX+CARE™ range of first aid kits comprises two discrete lines: the RFX+CARE™ systems (systems 1-5) and the RFX+CARE™

DIN 13164 standard system. These systems are made up of complementary first aid products that are packaged in polythene bags and identified clearly with reference numbers and pictograms illustrating both the contents and their use. Each RFX+CARE™ kit has been designed on the advice of emergency medical services organizations for use in a variety of situations: in vehicles, on sports fields, around the home and at rock festivals.

We can also customize first aid kits to suit your special requirements with a range of optional extras from system 1-5 .

System 1

- 6 Skin cleansing swabs
- 2 Dry swabs
- 9 Medium washproof plasters
- 2 Large washproof plasters
- 2 Small washproof plasters

Art. no. 4001000

System 2

All artwork must be received digitally in 300 dpi high quality. Artwork should preferably be Illustrator files .eps. or .ai, with outlined text including photos, although we are able to work with .pdf, tiff and .jpg files.

Production process has limitations regarding certain typestyles. We will follow – as closely as possible – the typestyle requested, but reserve the right to make any necessary changes, subject to the client's mailed approval.

Heat Transfer: When printing logos using heat transfers gives you the best result. This method is used on all our RFX-Active, Hi-Vis garments and first aid soft bags.

Silkscreen printing: When producing simple logo and large quantities silkscreen printing can also be used on our RFX-Active, Hi-Vis garments and first aid soft bags.

We use silk-screening on our high-gloss reflective products when printing on the surface.

Templates: To make the design process easier for you we have templates available for all our products.
